Aviation S.A.

GLOBAL AVIATION SA

ABOUT US / FACILITIES

Global Aviation SA was founded by a group of aviation experts in 1997, having its base in Athens, Greece. Since its incorporation, Global Aviation has a mission of offering top-quality services in the fields of pilot and cabin crew training, aircraft maintenance and aircraft sales, based on three fundamental principles:

Safety, Quality, and Honesty.

More than 20 years of operation

Global Aviation (EL.ATO.102) has been approved by the Hellenic Civil Aviation Authority (HCAA), a full member of the European Aviation Safety Agency (EASA) to provide theoretical and flight training to students and ultimately award them with an EASA pilot's license, fully recognised in all 32 EASA member states.

"Staying true to our three fundamental principles, we will always put the students' **Safety** above everything else. We will provide them with the best possible **Quality** of training, offering them the opportunity to train with the best instructors and use only the finest training material, whether on the ground or in the air. Above all, we will always be **Honest** with our students, in an effort to guide them through the challenging path of aviation training and into the world of professional aviation."

Alexandros Tsaktanis - Managing Director

GROUND SCHOOL BASE ATHENS, GREECE

Global Aviation's Ground School Base, along with the Aircraft Sales Division, is located in 98 Athinon Avenue Building, Athens, Greece. The 6-story building includes classrooms, meeting rooms, lounge areas, as well as administrative staff offices, the Marketing & Public Relations department and the Admissions' office for the Cabin Crew.

All Ground School classes, as well as the ICAO Level 4 English Language Proficiency Test examinations take place in Global Aviation's Athens building. Situated only a few minutes away from the center of the city, Global Aviation's Headquarters are easily accessible via Athens road network and public transportation.

FLIGHT SCHOOL BASE

CIVIL AVIATION AIRPORT OF PACHI,
MEGARA (LGMG)

Global Aviation's Airport Base is located in the Civil Aviation Airport of Pachi, Megara and includes Global Aviation's Flight Training Base. The Academy's Flight Training Base includes briefing and flight planning areas, pilot lounge area, the offices of the Head of Training and the Chief Flight Instructor, as well as the Admissions' office for potential pilots. Global Aviation's Maintenance Base, including the maintenance, hangar and CAMO offices are also based in the airport.

Global Aviation's Airport Base is only 40 km from the center of Athens and is easily accessible via highway and Athens' suburban Railway.

Global's Maintenance Centre provides top-quality aircraft maintenance solutions and is certified by the HCAA to offer maintenance services for single and multi-engine piston airplanes, as Maintenance Organisation EL.MF.0004 & EL.MG.0039

THE FLEET

Global Aviation uses only the world's most famous trainers, Piper Aircraft. Students have a unique opportunity to train on a variety of new aircraft, all equipped with latest technology avionics. Global Aviation's fleet is comprised of single-engine piston PA-28 Warriors, and multi-engine pistons PA-44 Seminoles.

Dependable and resilient with responsive handling, Global Aviation's **Piper Warrior** upgraded with advanced avionics is the ideal aircraft for the demands of student pilot training.

The Piper Seminole, equipped with glass cockpit avionics, has clearly established itself to be the best multi-engine trainer available today.

The majority of the demanding instrument training is conducted on FNPT II flight simulators. Global Aviation owns and operates Elite FNPT II and Simnest A320 FNPT II MCC flight simulators.

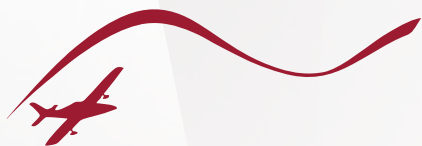

EVOLUTION S923 FNPT II MCC / ELITE EVOLUTION S812 FNPT II

The Elite Evolution S923 FNPT II MCC and **S812 FNPT II** simulate two types of aircrafts, a Generic Multi Engine Piston based on Piper-Seneca III PA-34-220T (FNPT II model), and a Generic Multi Engine Turboprop based on Beech King Air B200 (FNPT II MCC model).

SIMNEST A320 FNPT II MCC

The APS ready FNPT II MCC Simulator by Simnest is based on the Airbus A320. The simulator introduces the Fly-by-wire logic and the ECAM systems to our cadets, while learning to operate in a Multi-Crew environment. The simulator delivers a high quality of training and provides a strong base for the next step of a cadet's career, the Type Rating.
